TURF GENIUS WATER SAVER MIXTURE

\$10.61 / 2.2 Lb Bag \$19.44 / 4.4 Lb Bag \$53.28 / 10 Lb Bag \$130.81 / 25 Lb Bag \$284.92 / 55 Lb Bag

Performs well in low maintenance areas. • Turfgrass water conservation alliance (twca) mixture. Proven to provide a clear benefit in water conservation. • Excellent drought tolerance • Deep rooted system with self-repairing technology • Red coated seed for even distribution while planting • Works extremely well in dry, sandy, troubled soils • Edophyte enhanced • 100% certified Old Blend • 30% Certified Tall Fescue • 30% Certified Self-Repairing Tall Fescue • 20% Certified Chewings Fescue • 20% Certified Self-Repairing Ryegrass New Blend (2022) 30% Coated Certified Tall Fescue 30% Coated Tall Fescue 20% Coated Certified Fine Fescue 20% Certified Perennial Ryegrass 100% • 1 lb per 125 sqft

SUPREME FEED & SEED

\$10.58 / 4.4 Lb Bag \$83.97 / 40.0 Lb Bag

Features and benefits: • Rich in N and P; two primary nutrients essential for turf growth • Highly versatile and easy to use • Ideal for overseeding lawns and restoring bare spots • Ingredients are safe, non-burning sources of plant nutrition • Promotes superior grass seed germination and seedling nutrition • Directions for use: • Use Spring and Fall for optimum performance. • Begin spring applications just before soil temperatures reach 10 degrees C. • Bare Spot Repair: Loosen the top 5 to 7.5 cm (2 to 3 inches) of soil and apply at a rate of 12 kg./100 m² (25 lb./1,000 sqft). • Overseeding: Mow grass closely and then loosen the top 6 mm (1/4 inch) of soil in thin areas. Apply at a rate of 6 kg./100 m² (12.5 lb./1,000 sqft) using a broadcast spreader.

COATED WHITE CLOVER

\$15.03 / 1.1 Lb Bag

Robust, adaptive, drought resistant and somewhat shade tolerant • Sow in spring or late summer • Produces small flowers. May attract bees

CERTIFIED SEED

Certified seed guarantees the seed you buy has gone through all proper multiplication, inspection and cleaning processes to ensure a superior product. Certified seed is tested to ensure excellent germination, has improved traits like dark green colour, pest and drought tolerance and is tested grade by accredited experts.

ENDOPHYTE ENHANCED

Greatly reduce the risk of insect infestation and the need for chemicals with one of these endophyte enhanced mixtures. Endophytes are a natural and beneficial component to a lawn seed mixture. After the grass seeds germinate, endophytes create a natural compound within the plant which insects prefer not to feed on.
